Real Estate Salient theme

I choose the Real Estate Salient Theme because it is a free fully responsive WordPress theme for real estate agencies and brokers. It was built with Elegant inbuilt slider, customize options and a dedicated front page. It is compatible with the plugin Essential real estate which helps this theme to make it powerful to handle all properties. Very convenient to add and edit properties from the Front End and makes it very user friendly for someone who is not expert at WordPress.

Pros :

- Easy for the website creator to create.
- Very convenient for website admins to manage the properties by themselves without help from the website programmer.

Cons :

- Not a lot of control to edit the way it is structured.
- Dependent on an external code made by other programmers.
